Lets Talk About Some Stats

Data science is crucial for individuals as it empowers them to extract valuable insights from vast amounts of data, facilitating informed decision-making and strategic planning in their personal and professional lives.

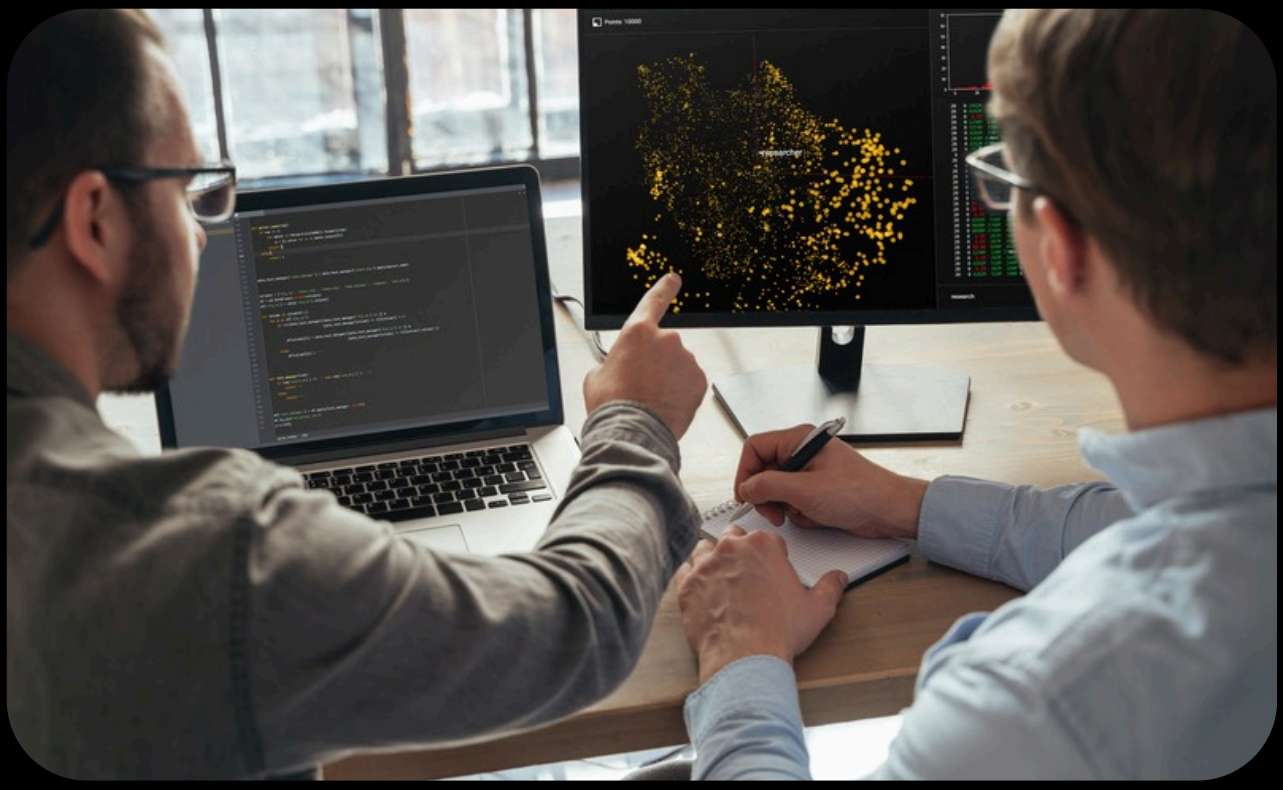

In a data science bootcamp, participants will master Python and its libraries to build and deploy models. They will learn to create deep learning models, Convolutional Neural Networks (CNNs), and chatbots. By acquiring these skills, individuals will enhance their ability to analyze data and make informed decisions in a data-driven world.

Course Description

Welcome to Data Science Bootcamp a program designed to jumpstart your career in the high-demand field of data science! This immersive course provides a solid foundation in essential tools like Python, PowerBI, SQL, and scikit-learn, equipping you with the practical skills needed for data-driven problem-solving.

Throughout the bootcamp, you'll work on real-world projects, gaining experience in building deep learning models, Convolutional Neural Networks (CNNs), and chatbots with expert guidance. The program also includes job support, quick doubt resolution, and access to a community forum, ensuring you're fully prepared for a data science career.

Data scientists are highly sought after, with competitive salaries often exceeding $100,000. By completing this bootcamp, you'll be ready to pursue advanced roles and unlock countless career opportunities. Join us at DataCrumbs and take the first step toward your future in data science!

Who Should Attend

Fresh graduates and current students in computer science, engineering, business, economics, mathematics, statistics, and data enthusiasts.

Professionals from computer science, business, mathematics, statistics who want to shift to Big Data Analytics, Data Science, and Machine Learning.

Executives interested in understanding the impact of the Big Data ecosystem on organizational growth.

Our Instructors

Our instructors have been amongst the top 0.4 % of data scientists in Kaggle (The largest community of data scientists)

Abis Hussain Syed

Data Scientist

5+ years Experience in computer Vision and making AI powered automated business pipelines.

https://www.linkedin.com/in/syedabis/

Bilal Saeed

Data Scientist

Senior Data Scientist with 7+ years of experience specializing in business intelligence, cloud technologies

https://www.linkedin.com/in/bilalsaeed18/

Shahrukh Mirza

Data Engineer

6+ years of experience by which he can navigate complex datasets and develop robust predictive models

https://www.linkedin.com/in/shahrukhrazamirza

Adeel Ejaz

Principal Data Analyst

A Principal Data Analyst with 7+ years in B2B SaaS, focused on revenue ops and KPIs, brings expertise in Python, SQL, and Power BI

https://www.linkedin.com/in/adeel-ejaz-99304360/

Mahnoor Khaliq

Backend Developer

She contributed to projects focused on developing scalable applications that enhance user experience and streamline data management.

https://linkedin.com/in/mahnoor-khaliq-061085242

Muhammad Owais

AI Team Lead

An AI Engineer with 3+ years in Generative AI and chatbots, blending math and creativity to build impactful solutions and inspire students

https://www.linkedin.com/in/muhammad-owais-2664b814a

Mujeeb ur Rehman

Machine Learning Engineer

As a AI Engineer with 5 years of experience, he has developed AI solutions using Large Language Models and Diffusion Models for impactful results

https://www.linkedin.com/in/mujeeb-merwat

Hataf Atif

Product and Data Specialist

A skilled professional in Product and Data, focusing on product analysis, development, and data governance and visualization.

https://www.linkedin.com/in/hatafatif/

Mudassir Raza

Data Engineer

3+ years of experience in data engineering along with data analytics.

https://www.linkedin.com/in/muhammadmudassirraza/

Usman Khalid

Data Scientist

He brings a results-driven approach to data analysis, visualization, and predictive modeling, ensuring high-quality solutions delivered within deadlines.

https://www.linkedin.com/in/hafizmuhammedusmankhalid/

Sara Arshad

Data Analyst

4+ years of experience in software development and entire project pipelines.

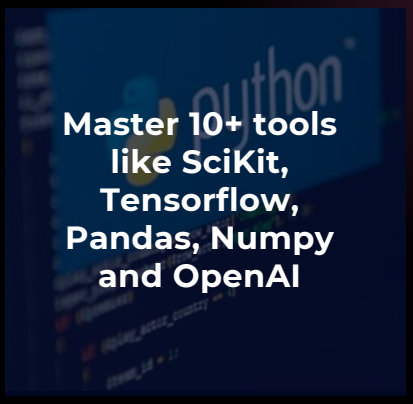

https://linkedin.com/in/sara-arshad-1aa182280

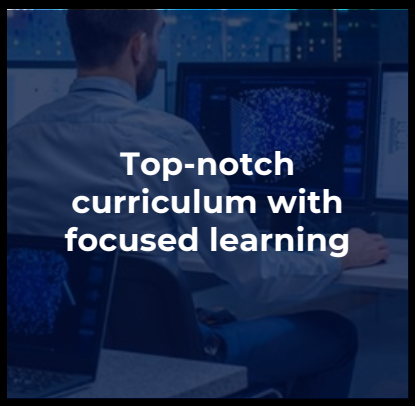

The only data science program in the industry with:

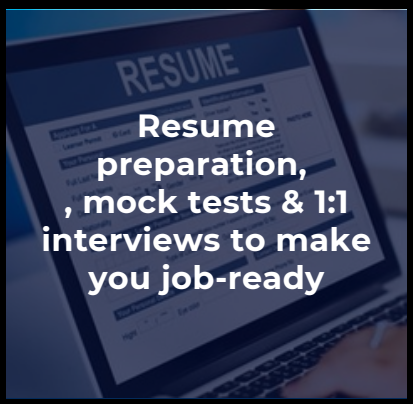

The Data Science & AI Bootcamp

Starts on 16th Aug

Getting Started with Python

- Working with Variables in Python
- Understanding Data Types
- Control Flow and Logical Operators
- Randomisation and Python Lists
- Python Loops
- Python Functions & Karel

Machine Learning (Regression)

- Data Preprocessing in Python
- Linear Regression
- Multiple Linear Regression
- Polynomial Regression
- Support Vector Regression
- Decision tree Regression
- Random Forrest Regression
- Evaluation & Selection

Machine Learning (Classifcation)

- Classification Algorithms
- Logistic Classification
- K-Nearest Classification
- Principal Component Analysis
- Clustering Algorithms
- K-Means Clustering
- Hierarchical Clustering
- Evaluation & Selection

Deep Learning

- Deep Learning in a glimpse
- Artificial Neural Networks (ANN)
- Convolutional Neural Network (CNN)
- Recurrent Neural Network (RNN)
- Transformers
- Evaluation & Selection

The Data Science & AI Bootcamp

Generative AI/N8N

- Intro to Generative AI
- Foundation Models & LLMs
- Gemini/OpenAI/DeepSeek
- Prompt Engineering
- Multimodal Models (Text , Image and Audio)
- Retrieval-Augmented Generation (RAG)
- Introduction to LangChain
- n8n / workflow automation for pipelines & ops

Data Analytics (Module-1) (Optional)

- Inserting Data
- CRUD Basics
- CRUD Challenge
- String Functions
- Refining Selections
- Aggregate Functions
- Revisiting Data Types
- Comparision Operators
- Logical Operators
- Constraints

Data Analytics (Module-2) (Optional)

- Introduction to PowerBI and Data Loading
- Data Modeling and Relationships
- Building Interactive Reports and Visualizations
- Publishing and Sharing Dashboards:

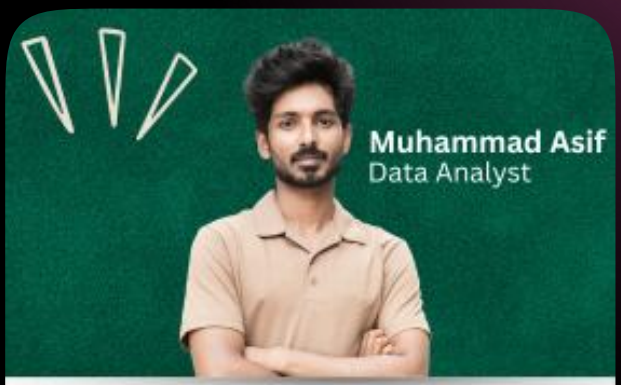

After the lectures, you'll have a two-month internship, plus sessions on CV crafting and mock interviews to ace interviews and build a personal brand and portfolio

Your learning matters. Check past student reviews to make an informed choice.

Become a part of the DataCrumbs family
and watch your career soar!

The PowerBI course taught me so much about data visualization. I can now create professional dashboards that make my reports look amazing. The step-by-step guidance and practical sessions were incredibly beneficial.

The PowerBI course was a great investment. I learned how to create professional-looking dashboards that are very useful for my job. Highly recommend it!

This BootCamp was a game-changer! The projects and advanced topics helped me improve & automate my business intelligence skills. Highly recommend! The instructors were supportive and knowledgeable.

Great course! Learned Python from basics to advanced. The hands-on projects were invaluable. I easily transitioned into a data analyst role. The curriculum was well-structured and engaging.

Why Join This Bootcamp?

Our alumni work at reputed technology companies and promising startups

DataCrumbs

Ignite Your Future!

About

DataCrumbs is Pakistan's first data-focused edtech platform, delivering premium courses to upskill the workforce. We provide exclusive access to job support, doubt resolution, and a community forum. Our Data Science BootCamp equips you with the knowledge and confidence to pursue advanced roles in Data Science development, unlocking numerous career opportunities. Join DataCrumbs and ignite your future with cutting-edge Data Science and AI skills.
